## SCACP & AM SCA Management Overview

### SCACP & AM SCS Communications Management:

- SCS Display Commands
- SCS Control

### SCACP & AM LAN ci Management:

- LAN ci Problem Symptoms
- Display Commands
- VC Control
- Channel Control
- LAN Device Control
- Trace Functions

### SCACP Miscellaneous functions

### SCACP & AM Futures

# SCA Management

## ci Problem Symptoms

**Displaying counters to determine SCS Port & Circuit state & performance**

**Control of Circuit priority, for multi-ci clusters.**

**Control SCS Port priority**

# ci Problem Symptoms

Communication trouble in OpenVMS Cluster systems may be indicated by symptoms such as the following:

- Poor or erratic/fluctuating application performance
- Console messages:
  - “Connection loss” OPCOM messages
  - “%PNAO ...Virtual circuit closed by port” messages
  - “%PEAO ...Excessive packet losses on LAN Path ...” messages  
(NEW in V7.3 & higher)
- Repeated loss of connections or one or more circuits over a short period of time (fewer than 10 minutes)
- CLUEXIT bugchecks

## Is it Really a ci Problem?

**Before you initiate complex diagnostic procedures, do not overlook the obvious.**

**Always make sure:**

- The hardware is configured and connected properly
- The network is started.
- SCS\_, NISCA\_, & PA... System parameters are set correctly & consistently on all nodes in the OpenVMS Cluster.

## SCACP & AM to the RESCUE!!

**NEW & IMPROVED ci MANAGEMENT TOOLS:**

- SCACP is a CLI Utility for managing SCA cluster interconnects.
  - Complements SHOW CLUSTER
  - Note: Initially (V7.3) SCACP was only usable with PEdriver & Required SYSPRV
- Availability Manager(AM) provides equivalent GUI displays, & fixes (a.k.a.:commands).
  - Use AM for continuous run-time monitoring, & control.
  - Use SCACP for quick checks. Remote access, & .COM files.

## SCA Display functions

### Command

**SHOW CIRCUIT**

**SHOW PORT**

**SHOW commands are unprivileged just like SHOW CLUSTER.**

**Note: Initially (V7.3) SCACP required SYSPRV for all commands.**

### Function

**SCS CIRCUIT(s) info**

**SCS PORT(s) info**

## SHOW CIRCUIT

**SHOW CIRCUIT [nodename[/PORT=device]]  
[,nodename,nodename...]**

**Can use \* instead of 1st nodename.**

**Also blank is considered an \***

**/PORT – Allows restricting display to circuits to a node or nodes from a specific port.**

**/EXCLUDE=(nodename,...)**

**/INTERVAL -- Changes to counters since last SHOW command.**

**/OUTPUT=filename**

## CIRCUIT Information Display

**SHOW CIRCUIT [nodename [/PORT=device] -  
[, nodename [/PORT=device],...]] /EXCLUDE=  
[nodename [/PORT=device]]**

```
SCACCP> SHOW CIRC *
Circuit data for LARRY at 02-OCT 13:48:43.32

  Remote    LPort    Circuit Priority   Load      RPort      RPort
  Node      Name     State    Cur Mgt Class    Number    Type
  -----
  CURLY    PEA0      Open     0   0    100        DE        NI
  CURLY    PNA0      Open     0   0    140        F         CIPCA
  HSC951   PNA0      Open     0   0    140        1         HSC

Displayed info is the same as SHOW CLUSTER's CIRCUITS class, provided here for
convenience in controlling CIRCUITS.
```

## SHOW PORT

**SHOW PORT [portname][,...]  
/EXCLUDE=(portname, portname,...)  
/ALL -- include all data for chosen ports  
/COUNTERS -- port counter data  
/INTERVAL -- counters since last SHOW  
/OUTPUT=filespec -- direct output to file  
/SDA -- display in SDA format  
/SUMMARY -- include summary data**

## **SHOW PORT device [,device,...] - /EXCLUDE=device**

```
SCACP> SHOW PORT *

Port data for RAWH12 at 02-OCT 17:50:33.59

  Port   Mgt   Load     Msgs      Msgs      DGS      DGS
  Name   Prio  Clas    Sent     Rcvd     Sent     Rcvd
  -----  -----  -----  -----  -----  -----  -----
PEA0      0     10      2920     3481      0       0
PNA0      0    140     37454    33776      0       0
```

## **SCA Control functions**

<u>Command</u>	<u>Function</u>
<b>SET CIRCUIT</b>	<b>Both Control SCS Circuit selection</b>
<b>SET PORT</b>	<b>&amp; operation</b>

**Note: SCACP SET commands require SYSPRV.**

## SET CIRCUIT

(Intended direction)

**SET CIRCUIT nodename [,nodename,...]/PRIORITY=n**  
**/PORT=portname**  
(if not used, default port will be used)  
**/ID=nn** -- Used to resolve multiple CIRCUIT/port case  
**/EXCLUDE=(nodename,nodename,...)**  
**/ALL**  
**/PRIORITY=N** -- port priority value

## CIRCUIT Operation Control

**SET CIRCUIT [nodename [/PORT=device] -**  
**[, nodename [/PORT=device],...]/PRIORITY=n**  
**/EXCLUDE=nodename**

```
SCACP> SET CIRC TSTDOS /PORT=PEA0 /PRIORITY=4
SCACP> SHOW CIRC *
```

Circuit data for RAWH12 at 02-OCT 17:51:19.09

## LAN ci Management

### LAN ci (PEdriver/NI-SCA) Problem Symptoms

**Displaying counters to determine VC and Channel state & performance**

**Control of channel priority, for multi-channel Virtual Circuits.**

**Control LAN adapter priority**

**Start, Stop LAN adapter use.**

**Start, Stop, control, and display PEdriver tracing**

## LAN ci Problem Symptoms

LAN Communication trouble in OpenVMS Cluster systems may be indicated by symptoms such as the following:

Poor or erratic/fluctuating application performance

Console messages from device PEA0:

- “Connection loss” OPCOM messages
- “%PEA0 ...Virtual circuit closed by port” messages
- “%PEA0 ...Excessive packet losses on LAN Path ...” messages (NEW in V7.3)
- CLUEXIT bugchecks
- Repeated loss of connections or VCs to a LAN-connected node over a short period of time (fewer than 10 minutes)

(YES, these are essentially the same as the generalized ci problems discussed earlier.)

## Is it Really A LAN ci Problem?

**Before you initiate complex diagnostic procedures, do not overlook the obvious!**

**Always make sure:**

- The hardware is configured and connected properly
- The network is started.
- System parameters are set correctly on all nodes in the OpenVMS Cluster.

## LANci Display functions

<u>Command</u>	<u>Function</u>
<b>SHOW VC</b>	<b>PEDRIVER VC info</b>
<b>SHOW CHANNEL</b>	<b>PEDRIVER channel (LAN path) info</b>
<b>SHOW LAN_DEVICE</b>	<b>LAN device info</b>

# SHOW VC

**SHOW VC [nodename] [,nodename,nodename]...**

**/ALL -- include all VC data**

**/EXCLUDE=(nodename,...)**

**/COUNTERS -- counter data**

**/INTERVAL -- recent changes to counters**

**/OUTPUT=filename**

**/SDA -- use SDA formatting**

**/SUMMARY -- display only summary data (default)**

# SHOW VC

SCACF> show vc

## Trace functions

Reserved for OpenVMS Engineering & HP Service Use.

Commands & Output are subject to change from release to release.

(i.e.: DON'T USE THEM IN .COM FILES)

**SHOW TRACE**

**SET TRACE**

**START TRACE**

**STOP TRACE**

## SHOW TRACE

**SHOW TRACE channel,...**

**/CONTEXT -- parameters**

**/EVENT -- select events**

**/INPUT=filename**

**/OUTPUT=filename[.DMP]**

**/SORT -- trace entry sequence number sort (the default is a VC & channel sort)**

## SHOW TRACE/CONTEXT

SCACF> show trace/context

LARRY Trace Context 20-MAR-2001 18:23:53.46:

```
Trace buffer size requested 512 bytes
Trace buffer total allocated 5120 bytes
Trace buffer allocations 11 successful
Trace buffer allocations 0 failed
Current trace sequence number 151278
System cycle counter 40496 cps
Stop tracing 0 events after stop event
```

Trace	Stop	Default	Event
Active		Y	Error
			Penalize_ch
			Timer
			Listen_tmtr

## **SET or START TRACE**

**SET TRACE channel,...**

(SET and START TRACE are identical)

**/EVENT=([NO]event,...)**

**/STOP=([NO]event,...)- Event to trigger stopping  
trace data collection.**

**/DEFAULT -- restore defaults**

**/AFTER=n -- stop tracing n events after ‘stop trigger’  
event**

**/SIZE=nbytes -- set trace buffer size**

## **STOP TRACE**

**STOP TRACE**

**Stops all tracing.**

**To restart, use**

**SET TRACE/DEFAULT**

**or set specific desired tracing options**

## **SCACP Miscellaneous Commands**

**@procedurename -- execute a file of SCACP commands**

**EXIT or ^Z**

**HELP**

**SPAWN**

**INTENDED DIRECTION**

## Default Port Selection

(Intended direction)

**SET/SHOW DEFAULT\_PORT portname**

**SET DEFAULT\_PORT PEA0 sets the port to the PEdriver port.**

**SHOW DEFAULT\_PORT**

**SHOW DEFAULT\_PORT/OUTPUT=file**

## SCA Management

**Intended Directions:**

- **Provide Override of SCS automatic circuit selection:**

**SCACP> SET CONNECTION sysap /CIRCUIT=node - /PORT=device**

- **Add tracing to other SCS ports, extend it to sysap-sysap connections:**

**SCACP> SHOW TRACE [/PORT=device] [/CIRCUIT=node] - /CONNECTION=sysap**

**?What else would be useful?**
